

Astrology is the study of the movements of the celestial bodies in the belief that these movements can have an influence on human lives.

In hindi this subject is called as jyotish shastra where jyoti means a ray of light. The ray of light from sun ,moon and other planets and stars effecting a person's life is called as jyotish shastra.

There are numerous energies surrounding us. Some energies are what we are born with. Being a energy analyst we need to understand the reason for the disturbing field. It could be vastu ,Geopathology ,lack of required body minerals,astrology and lack of physical activity or social interaction.

Waves of the ocean are high and low with cycle of the moon. We are also 70 % water so it is clear that we get effected by the celestial bodies. Similarly sun is the source of energy for this solar system and controls our lives in a great way.

Each part of the body is controlled by a certain planet and gets reflected by the birth chart. Many evidences have been given in my blogs to match the situations. One just needs the right person to predict the same.
